STRENGTHS

Responsive UI development

API integration

Component-based coding

Debugging with AI tools

SUMMARY

Passionate fresher full stack developer skilled in React.js, Node.js, MySQL, MongoDB, and modern front-end development. Experienced in academic and self projects involving authentication, RESTful APIs, dashboard design, booking workflows, and responsive layouts. Eager to contribute to real-world development projects and grow within a dynamic engineering team.

PROJECTS

Smart RoRo Ferry Reservation & Information System

College Project | 2026

Designed and developed a full-stack ferry reservation system with user, agent, and admin modules. Built booking workflows, vehicle booking, schedule management, seat availability, secure authentication, RESTful API integration, and reusable React components.

PR Mart - Best Deals, Better Shopping

E-commerce Project | 2026

Built a responsive e-commerce website for online shopping with product listing, product details, cart flow, category-based browsing, and a clean user interface. Focused on smooth navigation, reusable components, responsive design, and a simple shopping experience for customers. Used AI tools to plan UI sections, improve product flow, debug issues, and refine overall code quality.

Responsive Design

Personal Portfolio Website

Self Project | 2025

Created a responsive portfolio website to present projects, skills, and achievements with interactive sections, smooth UI behavior, and a clean contact section. Added project showcase cards, skill highlights, and mobile-friendly layouts to improve personal branding. Used AI tools to refine layout ideas, improve component structure, debug styling issues, and enhance overall code quality.
